

# VENDING MACHINES FOR PERSONAL PROTECTION EQUIPMENT DISTRIBUTION

---

## PPE - Masks

- Employee protection through automated mask distribution.
- Easy and traceable unattended distribution.
- 24/7 availability at strategic workplace locations.
- Consumption Control.

**Is Your  
business  
equipped  
to counter  
COVID-19?**

# Jazz vending machine is the safest and most efficient solution to protect your employees.

## Capacity and Configuration

- Single product vending machine designed to distribute masks or an alternative PPE product.
- Layout: up to 7 trays and 6 spirals per tray, configurable according to requirements of the locations.
- Variable capacity from 336 and 462 items, dependent upon product packaging.
- Plastic trays ensure maximum durability and optimum hygiene.

## Positioning, installation and programming

- Compact dimensions: one or more machines can be easily installed in strategic workplace locations.
- Free standing, plug and play machines, ready to operate where they are most needed.
- Customizable programming with single-user access codes, which allocate the PPE required per individual over a specific period of time.
- Programmable access to the vending machine:
  - 24/7 option: allows product dispensing at any time, avoiding people gathering whilst waiting to use the vending machine.
  - Programmable option: restricts use of the dispensers to specific user-defined time slots.

## Machine management & Consumption control

- The consumption control systems allows to monitor use of the machine by each individual employee.
- Distribution is monitored by an infra red system located in the delivery bin.
- The consumption data of each employee is retrievable and can be stored or uploaded to the company ERP.
- Pull out delivery bin simplifies both product collection and machine cleaning.
- The machine has a capacitive keyboard and functional display..
- LED lighting ensures excellent product visibility.

Necta's local offices and agencies will assist you in customizing, programming and installing your machines so that they can be put to use without delay.

The product display area is equipped with a security lock and LED lighting.

A numeric keyboard allows users to input the personal codes with which they have been assigned.

Pull out delivery bin, ergonomic and hygienic
